

BIRTH DEFECTS IN WEST VIRGINIA

ABOUT 1 IN EVERY 33 BABIES IS BORN WITH A BIRTH DEFECT IN WEST VIRGINIA.

Birth defects are health conditions that are present at birth that change the shape or function of one or more parts of the body. Common birth defects include heart defects, cleft lip and cleft palate, and spina bifida. Birth defects can affect a baby's overall health, how the body develops, and how the body works. Birth defects can greatly impact the lives of babies and their families.

EACH YEAR IN WEST VIRGINIA

More than

18,100

babies are born.

About

500

babies will be born with a birth defect.

About

1 in 5

infant deaths is due to a birth defect.

WE NEED INFORMATION TO BETTER UNDERSTAND BIRTH DEFECTS.

The [West Virginia Birth Defects Surveillance System](#) is a tracking system that collects information on babies born with defects in West Virginia (WV). Tracking birth defects is crucial for understanding ways to prevent birth defects and supporting West Virginia children and families impacted by birth defects.

A strong birth defects tracking system is needed to:

IDENTIFY CAUSES

We don't know what causes most birth defects.

HELP FAMILIES CONNECT TO SERVICES

Children with birth defects and their families need services and care.

“Only when we support birth defects tracking programs will we have data to understand why birth defects happen, how to treat them, and what families need to thrive.”

JANE C.

FIGHT NEW THREATS

Threats like Zika and opioid exposure put WV children at risk for birth defects.

EDUCATE AND SUPPORT COMMUNITIES

Families and communities in WV need information and resources to prevent birth defects.
