

1,125 babies were born preterm in Maine in 2024. Maine ranks 15th of 52 (includes all states, DC, and Puerto Rico) for preterm birth with a rate of 9.7%.

Maine is among the top ten best states with the highest rates of adequate prenatal care reception.

Maine is currently implementing three of six supportive maternal and infant health initiatives included in this year's Report Card.

The preterm birth rate in Maine was **9.7%** in 2024, higher than the rate in 2023

PRETERM BIRTH GRADE

US RATE	ME RATE	ME RANK
10.4	9.7	15

Percentage of live births born preterm

Note: The change in 2024 was not a statistically significant ($P < 0.05$) increase compared to 2023. Statistical significance means the difference is unlikely to be due to chance and likely reflects a meaningful change, though it may not always be large.

The data below illustrates differences in preterm birth rates by race/ethnicity and insurance type, which may reflect broader social and economic factors

Preterm birth rate by maternal race/ethnicity, 2022-2024

Preterm birth rate by insurance type, 2022-2024

Note: These data can serve as a starting point for discussions about addressing disparities caused by community factors and experiences. Preterm birth rates for "other" insurance types: self pay: 5.3%; Tricare: 9.7%; Indian Health Service: N/A; and all other types: 11.1%.

Maine

Some health conditions make people more likely to have a preterm birth or experience other poor birth outcomes

The tiles display the percentage of all live births exposed to each condition in 2024.

Note: More than one factor can occur at the same time. Hypertension, diabetes, smoking, and unhealthy weight occur prior to pregnancy. US percentages are as follows: smoking: 3.0%; hypertension: 3.4%; unhealthy weight: 34.8%; diabetes: 1.3% and hypertension in pregnancy: 10.4%.

The infant mortality rate decreased in the last decade; in 2023, 66 babies died before their first birthday

Note: The change in 2023 was not a statistically significant decrease compared to 2022.

The infant mortality rate among babies born to Black moms is 2.2x the state rate

Infant mortality rate by maternal race/ethnicity

Rate per 1,000 live births, 2021-2023

Leading causes of infant death

Percent of total deaths by underlying cause, 2021-2023

Note: PI = Pacific Islander; AIAN = American Indian/Alaska Native; PTB/LBW = preterm birth and low birth weight; SUID = sudden unexpected infant death. Other causes account for 41.6% of infant deaths. Leading causes of infant death chart was updated on February 2026.

Maine

The rate of inadequate prenatal care among babies born to Black moms is 3.2x the state rate

10.5

PERCENT

INADEQUATE PRENATAL CARE

Percentage of babies whose mom received care beginning in the fifth month or later or less than 50% of the appropriate number of visits for the infant's gestational age.

82.9

PERCENT

FIRST TRIMESTER INITIATION OF PRENATAL CARE

Percentage of babies whose mom started prenatal care in the first trimester of pregnancy.

Inadequate prenatal care by maternal race/ethnicity, 2022-2024

Note: PI = Pacific Islander; AIAN = American Indian/Alaska Native.

The measures below are important indicators for the health of pregnant and postpartum women in Maine

24.6

PERCENT

LOW-RISK CESAREAN BIRTH

Percentage of Cesarean births for first-time moms, carrying a single baby, positioned head-first, and at least 37 weeks pregnant.

81.2

PER 10,000 HOSPITAL DELIVERIES

SEVERE MATERNAL MORBIDITY

Rate of unexpected outcomes of labor and delivery that result in significant short or long-term health consequences.

N/A

PER 100,000 BIRTHS

MATERNAL MORTALITY

The maternal mortality rate cannot be shown due to unreliable estimates and concerns with confidentiality.

December 2024. Agency for Healthcare Research and Quality, Rockville, MD. <https://datatools.ahrq.gov/hcup-fast-stats>.

	Preterm birth	Infant mortality	Low-risk Cesarean	Adequate PNC*	Severe maternal morbidity	Maternal mortality
Measure	xx.x%	x.xx	xx.x%	xx.x%	xxx.x	xx.x
Rank	XX of XX	XX of XX	XX of XX	XX of XX	XX of XX	XX of XX
Direction†	Improved	No change	Worsened	No change	Improved	Improved
HP2030 Target	9.4% of live births	5.0 deaths per 1k births	23.6% of low-risk births	80.5% of live births	64.4 per 10K hospital deliveries	15.7 deaths per 100K births

Note: *Measure differs from inadequate PNC. Adequate is presented to align with Healthy People 2030 target. Rank determined for all states with available data with 1 being the best. †Denotes statistically significant change from prior year ($P < 0.05$). See [Technical Notes](#) for details.

Maine

Adoption of the following policies and programs, along with sufficient funding, is critical to improving maternal and infant health in Maine

All efforts were assessed on 9/26/2025.

MEDICAID EXTENSION

State has extended coverage for women to one year postpartum.

MEDICAID EXPANSION

State has adopted this policy, which allows for greater access to preventive care before, during, and after pregnancy.

DOULA REIMBURSEMENT

State Medicaid agency is actively reimbursing doula care.

PAID FAMILY LEAVE

State has required employers to provide a paid option for families out on parental leave.

MENTAL HEALTH

State requires clinicians to screen Medicaid insured women for postpartum depression during a well-child visit and reimburses for the screening.

MATERNAL MORTALITY REVIEW

State has a maternal mortality review committee to understand causes of deaths, identify preventive factors, and recommend changes to improve care and save lives.

Legend

State has the indicated program/policy

State reimburses up to \$1,500

State is progressing legislation but not yet active

State does not have the indicated program/policy

Maine's Medicaid program, **MaineCare**, covered 4,604 births in 2024

39.7

PERCENT

LIVE BIRTHS PAID BY MEDICAID

March of Dimes recognizes the vital importance of Medicaid, which pays for 4 in 10 deliveries nationwide (as high as 62% in some states). Access to Medicaid coverage ensures that individuals can receive preventive services and other clinical care before, during, and after pregnancy.

Given Medicaid's critical role in supporting maternal, infant, and child health, March of Dimes urges states to:

- Maintain or expand eligibility and benefits for pregnant and postpartum individuals, caregivers, and children.
- Ensure that Medicaid enrolled moms and babies continue receiving care without disruption during the implementation of policy changes.
- Clearly communicate any policy changes, including work requirements, address verification, frequent eligibility reviews, and retroactive coverage limits, and allow ample time for contacting and completion of updates.
- Increase access to care in communities impacted by hospital closures or maternity care deserts.
- Increase access to evidence-based, quality telehealth services and technology, including remote monitoring, and support alignment of reimbursement across payers.
- Provide sufficient reimbursement to all providers to encourage participation in Medicaid programs.

Note: See [Policy and Program Booklet](#) for more details.
